Clifford Price, Superintendent
West Sabine School District
P.O. Box 869
Pineland, Texas 75968

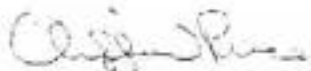

Dear Sir:

Timberline Constructors received the contract in the amount of \$1,100,000 to remodel parts of the existing facility and build a primary wing with a new elementary gym and fine arts room. Timberline Constructors and its job superintendent started the project while school was still in session. I am saying this to make one aware of how the project was worked around the students. One cannot say that there was not a disruption but I can say that the project was not harmful to the educational process.

The quality of the work on the Elementary Campus is excellent. The science and computer labs are examples of superior workmanship of Timberline. This is just one sample of the quality of work that Timberline has provided for the District. What I really appreciate about this company is the professional manner in which it deals with the school. An example of this would be that on occasions the plans call for one thing but based upon Timberline's experience, the job superintendent would recommend that an alternative plan would be as good, plus save the District money. The Company looks out for the interest of the School District.

Without reservations, I would recommend Timberline Constructors to your attention if you are seeking a quality, professional job.

Sincerely,

Clifford Price
Superintendent
West Sabine I.S.D.
